

JATIN MANGLA

Frontend Web Developer | (+91) 9540151718 | jatinmangla123@gmail.com | Delhi, India | LinkedIn: linkedin.com/in/jatin-mangla-22435060 | GitHub: github.com/JatinMangla | Portfolio: life-puce-kappa.vercel.app

PROFESSIONAL SUMMARY

Frontend Web Developer with 4.5 years of experience building responsive, secure, and high-performance web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Specialized in Web Vitals frontend performance optimization, AI API integrations (Claude API), enterprise authentication (MSAL, Google OAuth), and UI development aligned with VAPT, SOC2, and GDPR compliance standards. Delivered scalable fintech and enterprise interfaces serving 10,500+ active users supported by automated CI/CD pipelines.

TECHNICAL SKILLS

- Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, Node.js (basics)
- Frameworks & Libraries: React.js, Next.js (SSR / Server-Side Rendering), Redux (Toolkit/Thunk), Zustand, React Query
- Styling & UI: Tailwind CSS, SCSS, Material UI, CSS Modules
- Security & Compliance: VAPT Security Benchmarks, SOC2 UI Compliance, GDPR Data Privacy Standards
- Optimization & Testing: Web Vitals Optimization, Code Splitting, Dynamic Imports, Webpack, Lighthouse, Jest, React Testing Library, Cypress, Git, GitHub, CI/CD Pipelines, Vercel
- AI & API Integration: Claude API Integration, Prompt Execution Interfaces, RESTful APIs, Axios, WebSockets

PROFESSIONAL EXPERIENCE

AAPNA Infotech Pvt. Ltd | Delhi, India

Global software engineering firm delivering enterprise fintech platforms.

1) Mera Work (Fintech & Operations Suite) | Dec 2021 – Present

- Cut initial page load times by 30% and improved Core Web Vitals metrics on Mera Monitor by enforcing Webpack bundle optimization, dynamic code splitting, and lazy loading strategies.
- Accelerated feature delivery velocity by 20% by engineering 50+ reusable UI components compliant with VAPT, SOC2, and GDPR security standards using React.js and TypeScript.
- Secured application access for 10,500+ active users by implementing Microsoft MSAL and Google OAuth Single Sign-On (SSO) authentication workflows.
- Rendered real-time financial tracking dashboards using dynamic ApexCharts, React Query, and Redux REST API integrations.
- Reduced client-reported UI defects by 25% by standardizing cross-browser responsive design patterns across 12+ core modules.
- Automated component unit testing suites using Jest and React Testing Library within CI/CD pipelines to elevate frontend code reliability.

2) Screen Coach | Jul 2022 – Nov 2022

- Delivered 95% cross-device interface compatibility for a low-memory set-top box application using lightweight vanilla JavaScript and custom CSS execution.
- Optimized real-time data rendering by 15% through event loop execution tuning and REST API integration with Node.js backends.

3) UI Integration Projects | Jan 2022 – Jul 2022

- Expanded platform accessibility by 30% by developing cross-browser responsive interfaces for WhatsApp, Telegram, and SMS automation flows.

PERSONAL PROJECTS

AI Career & Prompt Execution Platform | Next.js (SSR), TypeScript, Claude API, Tailwind CSS, Zustand

- Reduced response UI rendering latency to under 100ms by implementing streaming response handling for Claude API integrations, Next.js SSR, and lightweight Zustand state management.
- Built interactive prompt execution interfaces and dynamic skill roadmap visualization modules for automated career guidance.

Enterprise Analytics Dashboard | React.js, TypeScript, Tailwind CSS, Chart.js, Cypress

- Rendered real-time data analytics dashboards featuring interactive charting components and dynamic multi-variable data filtering.
- Prevented UI state regressions by writing end-to-end test suites using Cypress within CI/CD workflows to validate persistent state updates across dynamic data feeds.

Dev Workflow & Task Management Board | React.js, Redux Toolkit, TypeScript, Tailwind CSS

- Standardized client-side state synchronization using Redux Toolkit to enable drag-and-drop workflow interactions and optimistic UI updates.
- Built local storage state persistence workflows and mock REST services, achieving 100% responsive cross-platform layout coverage.

CERTIFICATIONS & AWARDS

- Certifications: AI & Prompt Engineering (DeepLearning.AI), Claude API Development, React.js Advanced Development
- Awards: Code Craftsman Award, Performance Excellence Award (AAPNA Infotech)

EDUCATION

- Master of Computer Applications (MCA) | Galgotias University | 2019 – 2021
- Bachelor of Computer Applications (BCA) | Institute of Management & Education | 2015 – 2019
